www.rurallivestock.co.nz

Welcome to our 6th Sale at 77 Maskells Road.

We are all looking forward to catching up with our many friends on Sale Day or beforehand for a look through the bulls.

Like most South Island farmers we are not enjoying this long dry spell and the cattle don't think much of it either. In years like this the EBVs give a great guide to a bull's potential which he might not be expressing fully.

Woodburn Herefords and Speckle Parks. Tim and Helen have made the tough decision not to offer any bulls in this year's sale due to the current weather conditions, saying "We wouldn't be doing the bulls justice like they deserve.

The bulls on offer are the type we are endeavouring to breed with good temperament, thickness, sound structure and balanced EBVs. Many have curve bending data, with 17 above average for calving ease.

CONDITIONS OF SALE

- The sale will be conducted under the usual terms and conditions of the N.Z. Stock and Station Agents Assn.
- 2. Each lot becomes the property of the purchaser at the conclusion of the sale.
- 3. Although every care has been taken in ensuring the accuracy of this catalogue no responsibility is accepted for any errors that may be included therein.
- 4. Transport: Shall be paid by the Vendor throughout the South Island and to Feilding in the North Island providing Bulls have left the property within 14 days of the sale date.
- 5. Guarantee: The entry of any bull in this catalogue constitutes a Guarantee of structural soundness that affects the bull's ability to breed for three years. The purchase price will be refunded (without interest, expenses cost or damages) should the bull prove totally infertile (a vet certificate is required to validate infertility) and provided that the purchaser shall throughout the guarantee period assure the bull has proper care and attention and is maintained in good condition and health including annual BVD vaccination. The value of the bull shall decrease by 1/3 each year minus killing revenue and commission. The incapacity due to injury, neglect or illness suffered or contracted after the sale is not covered by the guarantee. The vendor reserves the right to change the catalogue order.
- 6 TB Status is C10 over both herds
- All bulls have been BVD blood tested negative and have been vaccinated twice with Bovillis BVD.
 Annual booster due in September.
- 8. G.S.T. All bulls sold are G.S.T exclusive
- 9. All bulls in this catalogue have been NAIT tagged.
- 10. Only bulls that have been selected for transfer are eligible for transfer.
- 11 Vendors reserve the right to collect semen from any bull at a later date at vendor's cost and at purchaser's convenience.

On behalf of the vendor, Rural Livestock Ltd will pay a purchasing rebate of 6% of the purchase price excluding GST, plus GST, to livestock agents with a Rural Livestock Monthly Account that are also Accredited Agencies on bidr® where the buyer has registered on bidr® under that Accredited Agency.

OSH

Every effort will be taken by the Vendors, Rural Livestock Ltd, their staff and assistants, both on the sale day as well as any visits of inspection to ensure the safety of intending buyers and visitors. We wish however to advise that while this sale is run under normal management conditions, certain dangers exist in relation to livestock and their environment. Visitors should take care to ensure their personal safety.

DISCLAIMER:

The BREEDPLAN Estimated Breeding Values (EBVs) contained within this sale catalogue were compiled by the Agricultural Business Research Institute (ABRI) from the data supplied by breeders. Neither Hereford NZ nor ABRI oversee or audit the collection of this data.

SEMEN EVALUATION AND FERTILITY TESTING

Xcell Breeding Services semen evaluation and fertility testing is a practical method used worldwide to eliminate bulls with less than satisfactory breeding potential and is part of our procedure to demonstrate normal reproductive ability. Xcell Breeding Services uses this safe and reliable method to assist the breeder in their desire to produce quality animals.

The evaluation consists of:

- Palpation and examination of the testicles, the testis should be firm, equal in size with no palpable abnormality and have scrotal diameter in keeping with industry standards.
- The penis and sheath are examined for any apparent abnormality e.g. sores, lacerations, abscesses, hair rings, warts, cork screw, penile frenulum, scar tissue, signs of damage. During electro stimulation the penis must extend from the sheath, straight in the midline of the bull.
- Microscopic evaluation of a semen sample for Motility (% of live sperm within the sample) and morphology (% of normal vs. abnormal sperm within the sample).

All the above information is considered and, where there is any departure from normal the bull is either failed outright or re-evaluated at a later date.

Each bull presented by Rob Stokes & Rob Burrows
has undergone Xcell Breeding Services semen evaluation and fertility testing
on 11th March 2024

Greg Mckay General Manager

Disclaimer. As the testing is often done some months prior to the bull being joined, it is important to appreciate that subsequent ill health or injury may render the animal either temporarily or permanently infertile.

It is important to observe young butts working and it is good practice to back up mate with a proven sire after 2 cycles to cover the possibility of any possible subsequent temporary inferbility. 03 312 2191 143 RANGIORA WOODEND ROAD. WOODEND WWW.XCELL.CO.NZ

HEREFORD NZ EBV's Explained

BREEDPLAN EBVs and selection indexes remove the effects of non-genetic factors (e.g. feeding regimes, animal age) from what is seen and measured to provide the best measure of an animal's genetic merit. BREEDPLAN information should always be used in conjunction with other selection criteria, including visual assessment.

A BEST PRACTICE GUIDE TO SELECTING YOUR NEXT NEW ZEALAND HEREFORD SIRE

A BREEDPLAN Guide to Animal Selection allows you to select the best genetics for your herd in four easy steps:

- 1. Identify the New Zealand Hereford selection index of most relevance to you.
- 2. Rank animals using the chosen selection index.
- 3. Consider the individual EBVs of importance.
- 4. Consider other traits of importance (e.g. visual assessment).

The majority of these steps can be undertaken online, allowing you to generate a shortlist of bulls for potential purchase ahead of sale day. The searchable version of this catalogue can be found online at www.herefords.co.nz or www.pivotdesign.co.nz/catalogues.

NEW ZEALAND HEREFORD BREEDPLAN

New Zealand Herefords publishes the following BREEDPLAN EBVs and Selection Indexes. Please note that only EBVs from the same BREEDPLAN analysis can be directly compared.

Growth EBVs	Fertility & Birth EBVs	Carcase EBVs	Other EBVs	Selection indexes
Birth Weight	Scrotal Size	Carcase Weight	Docility	Hereford Prime
200 Day Growth	Days to Calving	Eye Muscle Area	Maternal Value	Beef Heifer
400 Day Growth	Gestation Length	Rib Fat		Dairy Beef
600 Day Growth	Calving Ease Direct	Rump Fat		Scan below for more detail
Milk (Maternal)	Calving Ease Daughters	Retail Beef Yield		
Mature Cow Weight		Intramuscular Fat		

Details about the Hereford Selection indexes can be found at: https://breedplan.une.edu.au/ media/f1bh1b4n/using-new-zealand-hereford-selection-indexes.pdf

More information, including EBV descriptions and how to use them, can be found in the Using & Understanding BREEDPLAN EBVs booklet.

https://breedplan.une.edu.au/media/dtqpdm34/using-and-understandingbreedplan-ebvs.pdf

This sale will be hosted by bidr® (bidr.co.nz) as a HYBRID ON-FARM auction, with online bidding and a live-stream available for online purchasers.

All intending online purchasers must register with bidr® using an account held with one of the bidr[®] partner agencies in advance of the sale date.

The bidr® team is available to assist intending purchasers with signing up and registering - please call 0800 TO BIDR (0800 86 2437), or email enquiries@bidr.co.nz for assistance at any point.

Alternatively, contact your local bidr* representative:

BEECHWOOD POLL HEREFORDS

On Account of Rob & Mary Ann Burrows

Phone:

0272 633 582 03 313 2857

Running 140 cows with the Richon cows in Lees Valley which involves some "hill work" in a very commercial operation. 30 old cows run at Marshmans Road plus the 30 2year heifers who return to Lees Valley after some Al. We have calved our 2 year olds since the start in 1962 which seems to build in early fertility. Because winters can be harsh in the Valley heifer calves are wintered on kale at Marshmans Road.

Sires and Al are shared with Richon with our home bred sires featuring strongly e.g Keep Ya Cool17, Kinda Magic21, Kapai28, keep Time 23.

Beechwood and Richon sale bulls continue to run together at Maskells Road with no outside contact. Of our 23 bulls on offer 12 are below average Birth Wt ,21 above average for 600 day, 18 above for scrotal and 21 above average for Carcase Wt.

Rob & Mary Ann Burrows

RICHON HEREFORDS

On Account of Stokes Family

Phone 0277 571 673 03 314 8251

Richon Herefords was founded in 1994 by purchasing females from Toby Hines, Taurau Valley Stud in Gisbourne and other cows from Kiwi and Leader Studs more recently.

Richon runs 140 registered cows alongside 400 commercial cows. 130 Beechwood cows have run in Lees Valley since 2015 in a Share Farming arrangement, pushing both Herds genetic base.

All finishing stock are farmed at Steffans Road, Cust property.

Bulls are sent to Balcairn property after weaning and stay there until Sale Day. No other classes of stock are run there. We acknowledge the threat of Bovis and all bulls are isolated from any other stock.

This will be our sixth Combined Sale at Maskells Road.

We look forward to your company for an enjoyable bull sale.

Rob, Julie and Roz Stokes

The GGP Bovine 100K is a powerful tool for taurus-influenced cattle, that includes 100,000 SNP markers. With a 100K genomic profile, the GGP Bovine 100K provides accurate information on relevant production and recessive traits. This test measures the rate of genetic gain through increased breeding value accuracies.

This delivers more accurate evaluation of genetic merit, genome wide selection, comparative genetic studies, and higher density imputation. The GGP Bovine 100K includes the most informative content from popular lower density commercial arrays. Utilise the best content from the most commonly used commercial genotyping arrays, and for a low affordable price, plus comprehensive parentage, disease and trait relevant SNPs with the GGP Bovine 100K Test.

- The GGP logo is displayed on all animals that have been SNP tested (with Neogen & PBB) and included in a Genomic Evaluation, therefore shows Genomics under Traits Analysed.
- All Neogen 100K tested animals have had parentage run by PBB DNA using the Helical system.
 This can include both sire and dam verification.

Comments: PP Selected by LIC from B&L Progeny test for 2021 calving run at Pamu's Renown farm.Involved 23 bulls of 8 breeds. In Time7 came out as the `All rounder` being 4th for low birth wt,5th @weaning wt,6th @400 day and 7th @600 day. Obviously his calves inherited his easy going temperament making them easily reared and with no horns.10'000 are presently being collected for this springs Al season. He has some nice sons in the catalogue with Lot 1 from a 2yr old daughter. Photo as a 5year old.
