Understanding SIL Information

SIL (Sheep Improvement Ltd) is the New Zealand sheep industry's performance recording and genetic evaluation database. SIL estimated breeding value (eBV) and selection index information is provided in some sale catalogue listings. These assist ram selection by giving the best estimate of genetic merit available.

INTRODUCTION TO SIL

Performance and physical appearance of animals are the result of a combination of factors; the genes they get from their parents, management such as feeding, and other effects such as age and rearing rank. To make genetic improvement we need to be able to assess how much of an animal's performance is controlled by the genes alone, as it is only the genetic component of performance that is passed on to the next generation. Visual assessment of animals - or even assessment on an individual animal's performance - can be a poor guide to the genetic merit of the animal.

SIL measures of genetic merit do not tell us everything about an animal. For example, in order to function as a sire, a ram has to be physically sound. Visual inspection of soundness should be used in conjunction with SIL figures to assess whether an animal will perform well as a sire and will produce productive progeny.

SIL terminology can look confusing if you are not used to it. The following explanations of common terms and variables can be used to interpret SIL data with reference to your breeding goals.

KEY DEFINITIONS

Estimated Breeding value (eBV):): Breeding values are the best estimate of the animal's genetic value as a parent for traits. They allow rams to be compared with all rams included in the same analysis. This may mean all rams from the same flock or all animals in an across-flock evaluation where there are strong genetic links between the different flocks (see "Interpretation" below).

Estimated breeding values are expressed in the units the traits are measured, weight traits are in kilograms, NLB in lambs per ewe lambing.

Indexes: An index provides a summary of overall economic breeding value of animals. The economic value of each trait is summed to give a total economic value of the ram's genetics. The economic value of a trait depends on the production system, therefore a number of indexes are used to describe different systems. For example, the New Zealand Terminal Worth (NZTW) index describes a system where all progeny are slaughtered. The New Zealand Maternal Worth (NZMW) index describes a system where ewe lambs are retained as replacements for breeding with surplus lambs going to carcass production.

Sub-indexes are sometimes reported. These refer to the economic value for traits of a particular type –e.g. Lamb Growth vs. Wool vs. Reproduction vs. Meat Yield (carcass quality). *All SIL indexes are expressed as cents per ewe lambing.*

INTERPRETATION

eBVs and selection indexes are a function of the population in which they are calculated. In all cases they are comparable within a single flock.

For every analysis SIL sets 1995 as the benchmark year and the average genetic merit of lambs born in 1995 is set to zero. Therefore, gBVs are measures of genetic merit for a ram compared to the 1995 average for that evaluation. If two flocks had different average genetic merit in 1995 the gBVs would have to be adjusted for the difference to make them comparable

When selecting a ram that is high genetic merit it is important to first select the flock the ram was bred in. The ram should rank highly within that flock for the key traits you are interested in. Index values provide the best guide to overall genetic merit across traits.

In summary, whichever flock you decide to buy a ram from, be sure to select one that is highly ranked by SIL. This will guarantee improved genetic merit in your flock compared to using rams selected without an accurate assessment of genetic merit.

EXPLANATIONS FOR COMMONLY USED SIL DATA

Abbreviations Definition	
gBV	gBVs (estimated breeding values) are expressed in the units the trait is measured in, and are an estimate of the value of the ram’s genetic merit for the trait
gBV Accuracy	Indicates the amount of information used in the prediction of the eBV. Traits that are more heritable and more related to other traits they are predicted from have higher accuracy.
WWT gBV	Weaning weight – “lamb growth”
LW8 gBV	Body weight at 8 months of age – rates animals for post-weaning growth
FATY gBV	(Whole carcass) Fat yield – kg per kg of carcass
EMA gBV	Eye muscle area
EMAc gBV	Eye muscle area corrected for carcass weight – a measure of muscularity
FAT gBV	Weight of fat in carcass
FD gBV	Fat depth ‘C’
NLB gBV	Number of lambs born
FW12 gBV	Fleece weight at 12 months of age
NZTW index (previously TSO)	New Zealand Terminal Worth is expressed in cents and is an estimate of genetic value for growth (TSG), meat yield (TSM) and survival (TSS).

NZMW index (previously DPO)	New Zealand Maternal Worth is expressed in cents and is an estimate of genetic value for number of lambs born (DPR), lamb survival (DPS), lamb growth + adult size (DPG+A), meat yield (DPM), and wool production (DPW).
Sub-indexes	Economic merit for a trait affecting farm profit e.g. Wool (DPW) or Reproduction (DPR)
NZGE	The New Zealand Genetic Evaluation (NZGE) involves all active SIL flocks, and non-active flocks that provide useful information on pedigree and performance. It objectively “compares” the performance of various traits – making it a powerful source of genetic information for commercial farmers.
Rank	Ranks represent the position in the flock-birth year cohort of rams present at weaning (for WWT gBV), at autumn LW (LW8 gBV), at scanning (meat trait gBVs, NLB gBV & indexes) and at shearing (FW12 gBV).

INTRODUCING THE NEW ZEALAND GENETIC EVALUATION (NZGE)

This year, Beef + Lamb New Zealand (B+LNZ) Genetics has launched a \$450,000 upgrade of its genetic engine. As a result, ram buyers and breeders will have access to even better genetic information, when making breeding decisions.

At the core of the upgrade is the move to a single weekly New Zealand Genetic Evaluation – the NZGE. The investment means evaluations can be run more regularly and much faster, thereby feeding information back to ram breeders in a more timely fashion.

The NZGE uses all relevant data available, in all SIL flocks. Evaluations are able to draw on information, such as CT and VIA scanning, therefore providing a more accurate estimate of traits, such as carcass merit.

Results are presented in a uniform way using the NZTW and NZMW indexes, allowing farmers to directly compare rams. In a nutshell, the higher the figure, the better the ram.

SIL CONTACT DETAILS

For more information, contact SIL via email (silhelp@sil.co.nz) or freephone 0800 745 435.

SIL is part of B+LNZ Genetics and is funded by farmer levies.

PLEASE NOTE: B+LNZ Genetics have used the most recent SIL data on file in preparation of this catalogue

NEW ZEALAND
SHEEP BREEDERS
ASSOCIATION

Information in relation to the SIL performance data present in this catalogue.

Data presented in this catalogue on Stonylea Rams and Ewes, SIL flock 237, is from SIL GE analysis No. 42801. NZ Terminal Worth dated 3rd November 2025. The analysis periods are 1995-2025 and the number of flocks of analysis, 1475

The data presented in this catalogue was provided with the assistance of New Zealand Sheep Breeders an approved SIL Bureau.

For further information, contact:

Nigel Jay, Mobile: 021 140 7827, Email: nigel.jay@actrix.co.nz

This sale will be hosted by bidr® (bidr.co.nz) as a HYBRID ON-FARM auction, with online bidding and a live-stream available for online purchasers.

All intending online purchasers must register with bidr® using an account held with one of the bidr® partner agencies in advance of the sale date.

The bidr® team is available to assist intending purchasers with signing up and registering – please call 0800 TO BIDR (0800 86 2437), or email enquiries@bidr.co.nz for assistance at any point.

Alternatively, contact your local bidr® representative:

Conditions Of Sale

1. The New Zealand Stock & Station Agent's Association Conditions of Sale and, to the extent deemed relevant by Hazlett's, Hazlett's Terms of Sale apply to this sale. When proceeds are credited or a purchase is debited to a Hazlett monthly credit account, then Hazlett's Monthly Account Terms of Trade (as amended from time to time) apply to the extent deemed relevant by Hazlett. These terms can be inspected at the registration desk and on the wall in the auction room.
2. Each lot shall become the property of the purchaser at the fall of the hammer.
3. Finance terms are strictly cash prior to delivery of any animals unless prior credit arrangements have been made with the Auctioneers.
4. Although all care has been taken to ensure the accuracy of the information contained in this catalogue, Hazlett's and their employees do not except any responsibility or liability as to mis-descriptions errors, omission, or mis-statements either directly or indirectly by the negligence of Hazlett's and/or their employees.
5. The sale will be conducted purchase price plus GST.
6. **Transport:** Leave full and explicit instructions in regard to transport.
7. **Insurance:** The selling agent can arrange insurance on any stock.
8. Upset price will be \$700.00 for Suffolk and Sufftex.
9. If a transfer is required the transfer price will be \$2,000.00.
10. **REBATE :** Hazlett will pay a purchasing rebate of 6% of the purchase price excluding GST, plus GST, to livestock companies & recognised independent livestock agents with a Hazlett's account who have introduced buyers to Hazlett's before the sale and/or accompanied buyers to the sale.

Overseas Export.

11. Prior to auction - Purchasers who wish to export the animal/s ("Export Purchasers") must advise the auctioneers at least 2 hours prior to the sale commencing that they are considering purchasing specific breeds at the auction. The Auctioneers will then advise all vendors of relevant breeds that their animals are being considered for export. Vendors not wishing to have their animals considered for export are to advise the Auctioneers.
12. Purchase at auction by Export Purchasers is conditional upon the animal/s purchased passing all relevant export protocol and testing (conducted at the Export Purchaser's expense). Full payment (plus GST) will be made at the fall of the hammer to the Auctioneers as per usual terms and conditions. Payment will be held by the Auctioneers until the animal/s leave New Zealand. Payment will be refunded to the Export Purchasers less all associated export costs for any animal/s purchased failing export protocol and testing.
